

In my website I used both inline and external css to achieve my desired results.

## Inline CSS:

```
<div id="column">
  <div class="w3-hover-shadow" style="border: 3px solid #beige;" id="schlCard">
    
    <a href="https://web.facebook.com/sigaboyCES129286" target="_blank"> <h2 id="schl">Sigaboy Central Elementary School</h2></a>
    <p class="title">Primary School Attended</p>
    <p id="desElem">
      Sigaboy Central Elementary School is the primary school in the Poblacion, Governor Generoso, Davao Oriental where I graduated
      in the year 2014-2015.
    </p>
  </div>
</div>
